Engine

Engine Model	Cat® C7.1	
Emissions	Meets U.S. EPA Tier 4 Final, EU Stage V, Korea Tier 5, China Nonroad Stage IV, Japan 2014 emission standards or India Bharat Stage III, Eurasian Economic Union Stage IIIA, UN ECE R96 Stage IIIA emission standards, equivalent to U.S. EPA Tier 3/ EU Stage IIIA.	
Net Power (1,800 rpm)		
ISO 9249/SAE J1349	151 kW	202 hp
ISO 9249 (DIN)	204 mhp	
Engine Power (1,800 rpm)		
ISO 14396	168 kW	225 hp
ISO 14396 (DIN)	227 mhp	
Bore	105 mm	4.1 in
Stroke	135 mm	5.3 in
Displacement	7.01 L	427.8 in ³

- Net power advertised is the power available at the engine flywheel when the engine is equipped with a fan, air cleaner, clean emissions module and alternator.
- Advertised power is tested per the specified standard in effect at the time of manufacture.
- Inline six-cylinder diesel engine with single turbo, charged with ATAAC and engine mounted aftertreatment (when equipped).
- No derating required up to 3000 m (9,842 ft) altitude.
- All Cat nonroad U.S. EPA Tier 4 Final, EU Stage V, Japan 2014, Korea Tier 5, and China Nonroad Stage IV diesel engines are required to use ULSD (ultra-low sulfur diesel with 15 ppm of sulfur or less) or ULSD blended with the following lower-carbon intensity fuels up to:
 - ✓ 20% biodiesel FAME (fatty acid methyl ester)*
 - ✓ 100% renewable diesel, HVO (hydrogenated vegetable oil) and GTL (gas-to-liquid) fuels
 Refer to guidelines for successful application. Please consult your Cat dealer or “Caterpillar Machine Fluids Recommendations” (SEBU6250) for details.

**Engines with no aftertreatment devices can use higher blends, up to 30% biodiesel.*

Air Conditioning

The air conditioning system on this machine contains the fluorinated greenhouse gas refrigerant R134a (Global Warming Potential = 1430). The system contains 1.1 kg of refrigerant which has a CO₂ equivalent of 1.573 metric tons.

Drive System

Description	Electronically controlled Hydrostatic drive with two variable displacement bent axis motors and two variable displacement slipper-type axial piston pumps
Travel Speed	Infinite variable speed from 0 to 10 km/h (0 to 6.2 mph)
Relief Valve Setting	47 500 kPa 6,890 psi

Implement System

Description	Load sensing, variable displacement piston pump
Maximum Continuous Flow	256 L/min 56.3 gal/min at 1,800 rpm at 1,800 rpm
Maximum Pressure	28 000 kPa 4,061 psi
Filter System	Implement return filter

Service Refill Capacities

Fuel Tank	320 L	84.5 gal
Diesel Exhaust Fluid (DEF) Tank (when equipped)	16 L	4.2 gal
Cooling System	32 L	8.5 gal
Crankcase (with filter)	16.5 L	4.4 gal
Final Drive (each)	15 L	4.0 gal
Hydraulic Tank	90 L	23.7 gal
Pivot Shaft	1.8 L	0.5 gal

Drawbar Pull

Weights and Dimensions

	Standard		Low Ground Pressure (LGP)	
Operating Weight ¹	20 358 kg	44,881 lb	22 762 kg	50,181 lb
Shipping Weight ²	18 468 kg	40,715 lb	20 440 kg	45,062 lb
1 Track Shoe Width:				
Standard ³	550 mm	22 in	—	—
Wide ³	—	—	800 mm	31 in
Narrow ³	450 mm	18 in	—	—
Track Rollers – Each Side		7		7
Number of Shoes – Each Side		38		38
Track on Ground	2542 mm	100 in	2542 mm	100 in
Ground Pressure:				
Standard Shoes	63.0 kPa	9.1 psi	48.5 kPa	7.0 psi
Narrow Shoes	77.0 kPa	11.2 psi	—	—

¹Operating weight: machine with construction package, general purpose bucket with teeth and segments, Heavy Duty Extended Life undercarriage, aftertreatment system, lubricants, 100% fuel tank and 75 kg (165 lb) operator. For machines without aftertreatment, subtract 287 kg (632 lb).

²Shipping weight: machine with construction package, general purpose bucket with teeth and segments, Heavy Duty Extended Life undercarriage, aftertreatment system, lubricants, 10% fuel tank. For machines without aftertreatment, subtract 287 kg (632 lb).

³Single or double grouser, with or without center holes.

963 Track Loader Specifications

Weights and Dimensions (continued)

2 Overall Machine Width (without bucket):

Minimum: Standard Gauge (450 mm/17.7 in shoes)	2300 mm	90.5 in
Maximum: Wide Gauge (800 mm/31.5 in shoes)	2900 mm	114.2 in

3 Ground Clearance	471 mm	18.5 in
---------------------------	--------	---------

4 Machine Height to Top of Cab	3325 mm	130.9 in
---------------------------------------	---------	----------

5 Machine Length to Front of Tracks (including rear bumper)	4943 mm	194.6 in
with Ripper, Add	586 mm	23.0 in

6 Ramp Angle	29°	
---------------------	-----	--

7 Overall Shipping Length (without bucket)	5841 mm	230 in
---	---------	--------

8 Hinge Pin Height at Maximum Lift	3940 mm	155.1 in
---	---------	----------

9 Lift Arm Clearance at Maximum Lift	3590 mm	141.3 in
Turning Radius	4.0 m	157.5 in

Bucket and attachment offerings may vary. Please consult your Cat dealer for availability.

963 Track Loader Specifications

Buckets and Couplers

Advansys™ Ground Engaging Tools

Cat track loader buckets come from the factory with Advansys™ bucket tips/adaptor/locking system. Advansys tips are built to give you maximum productivity and the lowest bucket lifecycle cost for your toughest applications.

- Cat Advansys offers a hammerless retention system, allowing for safe, fast removal and installation. Plus, the hammerless retention requires no special tools. Just turn the retainer 180° to install or remove the tips.
- Adapter design directs material flow over adapter strap, which can extend adapter service life and bucket lifecycle.
- Cast retention pin means no separate retention pin to buy or lose during tip replacements. The tip loads on the adapter nose, never putting the cast retention lugs under stress or wear.
- Cat Advansys bolt-on adapters are available for customers who want the versatility to switch between cutting edges when applications or environments change.

Got older track loader buckets? Wheel loader buckets? Mixed fleet? Advansys tips bring you added value because they can be adapted to fit any bucket in the industry.

Watch to learn more about easy installation of Advansys tips.

Cat Fusion™ Coupler

Cat Fusion™ couplers add increased versatility to your Cat loader with undiminished performance. Fusion is a system with a full complement of buckets, material handling arms, forks, and other attachments, equipping you to take on almost any job you can face.

Full Performance

- Full machine breakout force is available because the coupler adds zero offset.
- Provides the flexibility of a coupler with zero compromise of performance.
- The coupler sits inside the control arms, keeping the pivot point and load center nearly identical to pin-on tools.

Unsurpassed Durability

- Wedge mechanism stays tight even after thousands of cycles, eliminating wear and rattle, providing better tool control and productivity.
- Coupler and attachments last longer, reducing or eliminating repairs and replacement.
- Direct connection between the cylinder and wedge eliminates complex, failure-prone linkages.

Unmatched Versatility

- Operator has full visibility to fork tines, thanks to an open frame design.
- The Fusion system includes:
 - Buckets
 - Blades
 - Rakes
 - ITA and Construction forks
 - Material handling arms
- Fusion is a common interface, so multiple machines on your job can share tools as needed.

See how quickly you can change attachments with the Fusion coupler on your track loader: https://www.youtube.com/watch?v=ua7F26_k0Uw

963 Track Loader Specifications

Buckets

The Right Tool for the Job

All buckets can be used for digging, stump removal, loading, carrying, leveling, etc. Some buckets are more specialized:

Performance Buckets – optimized for loading and carrying

Multi-Purpose (MP) – grabbing material and grading with the clamp open

Flat Floor Buckets – Leveling, loose material handling

For maximum versatility, the Fusion coupler is compatible with a range of buckets, forks, rakes, material handling arm and more. Consult with your Cat dealer for compatibility.

Fusion Quick Coupler Buckets

Maximum Pry Out Force	85 kN	19,038 lbf

Standards

ROPS/FOPS

- ROPS (Rollover Protective Structure) offered by Caterpillar for the machine meets ROPS criteria ISO 3471:2008.
- FOPS (Falling Object Protective Structure) meets ISO 3449:2005 Level II.

Brakes

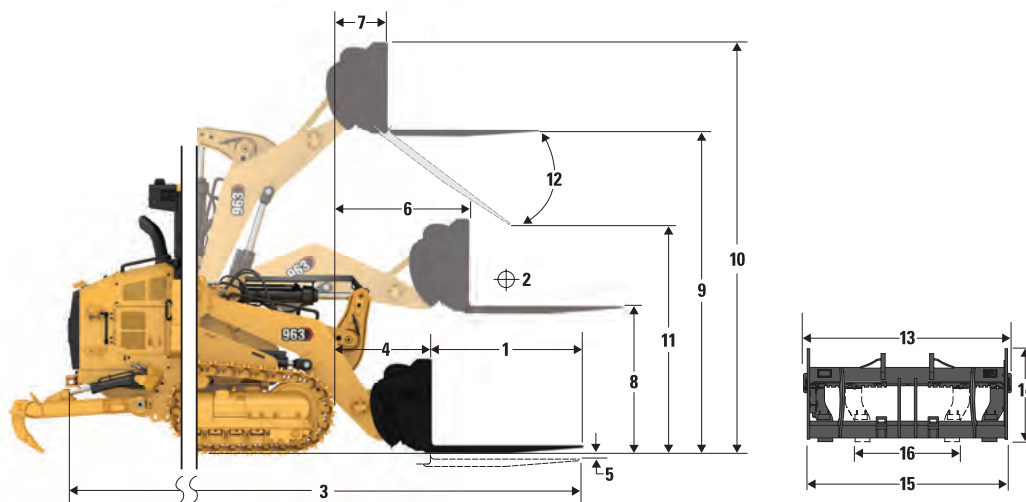

- Brakes meet the standard ISO 10265:2008.

Sound and Vibration Information

- The declared dynamic operator sound pressure level is 74 dB(A) when “ISO 6396:2008” is used to measure the value for an enclosed cab. The measurements were conducted at 70% of the maximum engine cooling fan speed. The sound level may vary at different engine cooling fan speeds. The cab was properly installed and maintained. The measurements were conducted with the cab doors and the cab windows closed. NOTE: The dynamic operator sound pressure level uncertainty is ± 2 dB(A).
- Hearing protection may be needed when the machine is operated with an open operator station for extended periods, in a noisy environment or with a cab that is not properly maintained.
- The guaranteed exterior sound power level is 109 dB(A) when the value is measured according to the dynamic test procedures and the conditions that are specified in “ISO 6395:2008.” The measurements were conducted at 70% of the maximum engine cooling fan speed. The sound level may vary at different engine cooling fan speeds.
- Sound level information for machines in European Union countries and in countries that adopt the “EU Directives”: If equipped, the certification label is used to verify the environmental sound certification of the machine to the requirements of the European Union. The value that is listed on the label indicates the guaranteed exterior sound power level (L_{WA}) at the time of manufacture for the conditions that are specified in “2000/14/EC.”

*Construction configuration with 450 mm (22 in) heavy duty tracks, standard counterweight (320 kg/705 lb) and additional counterweight (310 kg/683 lb).

**For crawler loaders, 35% of the tipping load or 100% of the lifting capacity, whichever is less. (SAE J1197:2011, EN-474-3:2010, ISO 14397-1:2007).

Standard and Optional Equipment

Standard and optional equipment may vary. Consult your Cat dealer for details.

	Standard	Optional		Standard	Optional
POWER TRAIN			ELECTRICAL		
Cat C7.1 diesel engine with engine-mounted aftertreatment to meet U.S. EPA Tier 4 Final, EU Stage V, Korea Tier 5, China Nonroad Stage IV, Japan 2014 emission standards		✓	Ground Level Service Center	✓	
Cat C7.1 diesel engine to meet India Bharat Stage III, Eurasian Economic Union Stage IIIA, UN ECE R96 Stage IIIA emission standards, equivalent to Tier 3/Stage IIIA		✓	24 volt heavy-duty alternator	✓	
Engine turbocharger	✓		Backup alarm	✓	
Air-To-Air After Cooler (ATAAC)	✓		Two horns	✓	
Modular cooling system for engine air intake, oil and water	✓		Two heavy-duty batteries, high output, maintenance free, 1,120 CCA	✓	
Hydraulic demand fan – electronically controlled, temperature sensing	✓		Main disconnect switch	✓	
Hydraulic fan, non-reversing		✓	Electric starter (heavy-duty, 24 volt)	✓	
Hydraulic fan, reversing		✓	Extra lighting – two additional LED lights at the bottom of cab facing forward plus 1 underhood light		✓
Electro Hydrostatic Control (EHC) for transmission	✓		LED flashing beacon		✓
Engine idle shutdown	✓		OPERATOR ENVIRONMENT		
Auto engine speed control	✓		Pressurized, sound suppressed, ROPS/FOPS Cab with tinted glass and right side sliding window	✓	
Electric fuel pump	✓		Cab package with one sliding side window and four halogen lights: two facing forward, roof mounted, two facing rearward, integrated in the air conditioner unit		✓
Water separator	✓		Deluxe cab package with two sliding side windows and eight LED lights: four roof-mounted facing forward, two facing rearward and two facing side integrated in the air conditioner unit		✓
Glow plug starting aid	✓		Deluxe high back seat – heated, with adjustable shock control		✓
Engine air cleaner		✓	Premium Plus high back seat – heated and cooled, lockable side-side isolator		✓
Engine air precleaner		✓	Adjustable armrests	✓	
UNDERCARRIAGE			Electro-Hydraulic, seat mounted control levers with faster processing	✓	
Heavy Duty Extended Life (HDXL) undercarriage and tracks (38 sections), 1850 mm (72.8 in) track gauge	✓		V-pattern and pedal steering controls		✓
Cat Abrasion undercarriage		✓	Joystick steering controls		✓
Oscillating track roller frames	✓		Joystick implement control		✓
Track guiding guards, end section	✓		Two-lever implement control		✓
Hydraulic track adjuster	✓		Seat belt, retractable, with buckling indicator on dash	✓	
Sprocket rims with replaceable bolt-on tough steel segments	✓		Four-point restraint ready seat	✓	
Sprocket guards	✓		Air conditioning and heating	✓	
Seven track rollers per side, with two upper carrier rollers, lifetime lubricated	✓		Heater/defroster with automatic temperature control and automatic blower control	✓	
Idlers, conventional type, lifetime lubricated	✓		Cab air powered precleaner		✓
			Rearview mirror, inside, adjustable	✓

963 Environmental Declaration

The following information applies to the machine at the time of final manufacture as configured for sale in the regions covered in this document. The content of this declaration is valid as of the date issued; however, content related to machine features and specifications are subject to change without notice. For additional information, please see the machine's Operation and Maintenance Manual.

For more information on sustainability in action and our progress, please visit <https://www.caterpillar.com/en/company/sustainability>.

Engine

- The Cat C7.1 engine meets U.S. EPA Tier 4 Final, EU Stage V, Korea Tier 5, China Nonroad Stage IV and Japan 2014 emission standards or India Bharat Stage III, Eurasian Economic Union Stage IIIA, UN ECE R96 Stage IIIA emission standards, equivalent to U.S. EPA Tier 3/EU Stage IIIA.
- Cat diesel engines are required to use ULSD (ultra-low sulfur diesel fuel with 15 ppm of sulfur or less) or ULSD blended with the following lower-carbon intensity fuels up to:
 - ✓ 20% biodiesel FAME (fatty acid methyl ester)*
 - ✓ 100% renewable diesel, HVO (hydrogenated vegetable oil) and GTL (gas-to-liquid) fuels

Refer to guidelines for successful application. Please consult your Cat dealer or "Caterpillar Machine Fluids Recommendations" (SEBU6250) for details.

**Engines with no aftertreatment devices can use higher blends, up to 30% biodiesel.*

Air Conditioning System

- The air conditioning system on this machine contains the fluorinated greenhouse gas refrigerant R134a (Global Warming Potential = 1430). The system contains 1.1 kg of refrigerant which has a CO₂ equivalent of 1.573 metric tonnes.

Paint

- Based on best available knowledge, the maximum allowable concentration, measured in parts per million (PPM), of the following heavy metals in paint are:
 - Barium < 0.01%
 - Cadmium < 0.01%
 - Chromium < 0.01%
 - Lead < 0.01%

Sound Performance

With cooling fan speed at 70% of maximum value:

Operator Sound Pressure Level (ISO 6396:2008) – 74 dB(A)

Exterior Sound Power Level (ISO 6395:2008) – 109 dB(A)

- The sound level may vary at different engine cooling fan speeds. The cab was properly installed and maintained. The measurements were conducted with the cab doors and the cab windows closed. NOTE: The dynamic operator sound pressure level uncertainty is ± 2 dB(A).
- Hearing protection may be needed when operating with an open operator station and cab (when not properly maintained or doors/windows open) for extended periods or in a noisy environment.

Oils and Fluids

- Caterpillar factory fills with ethylene glycol coolants. Cat Diesel Engine Antifreeze/Coolant (DEAC) and Cat Extended Life Coolant (ELC) can be recycled. Consult your Cat dealer for more information.
- Cat Bio HYDO™ Advanced is an EU Ecolabel approved biodegradable hydraulic oil.
- Additional fluids are likely to be present, please consult the Operations and Maintenance Manual or the Application and Installation guide for complete fluid recommendations and maintenance intervals.

Features and Technology

- The 963 uses up to 10% less fuel per hour than the 963K. The following features and technology may contribute to fuel savings and/or carbon reduction. Features may vary. Consult your Cat dealer for details.
 - Smart mode matches machine power to digging requirements automatically
 - Eco mode minimizes fuel consumption for light applications
 - Emissions reduction technology (when equipped) works in the background, with no action required from the operator
 - Remotely monitor fuel consumption, machine health, location, and hours on demand through Product Link™ and VisionLink®
 - Hydraulic demand fan reduces speed in cooler conditions to conserve power, save fuel and decrease sound levels
 - Remote Flash and Remote Troubleshoot

963

Track Loader Waste Handler/Demolition

A Waste Handler can take on a variety of tasks in a landfill or transfer station. Use it for pushing, shredding and pre-compacting waste. For added versatility, track loaders are also ideal for creating and maintaining access, digging cells and digging/carrying/spreading cover material.

Top Performer

- 963 uses up to 10% less fuel per hour than the previous model.
- Smoother implement and steering response, and improved steering performance provide more controllability.
- Updated cab offers more comfort and an intuitive 10-inch (254 mm) touchscreen dash display.
- Standard High Definition rearview camera shows prominently in the main display.
- Excellent visibility to the bucket and all around the machine enhances safety and helps operators work more confidently.

Waste Handler

- Specialized guarding, and seals help protect the machine and components from impact and airborne debris.
- Final Drive guarding helps prevent wrapping and damage.
- High debris cooling system with reversing demand fan – radiator fan folds out for easy cleanout access.
- Specialized air handling features help deliver cleaner air to the machine.
- Choice of buckets and track shoes allow you to further optimize the machine for greater performance and service life.

Enhanced Cleaning Waste Handler

- Helps reduce your clean-out time while adding ground pressure for more compaction.
- Wide gauge undercarriage equipped with a standard track width allows more space for debris to pass between the track roller frame, tracks and chassis.
- With less debris build-up, you spend less time cleaning.
- Helps reduce damage caused by debris carried on the tracks.
- Heavier waste configuration combined with narrower track shoes increases ground pressure for greater compaction.

Extreme Service Waste Handler or Demolition

- A tough, compact solution, ideal for transfer stations or demolition job sites.
- Added guarding, beyond the Waste Handler package, on lift and tilt cylinders.
- Screen helps protect windshield and operator from breakage and debris.
- Heavy duty bumper and hitch.
- Striker bars.
- Powered cab air precleaner.

963 Track Loader – Waste Handler/Demolition Specifications

Engine

Engine Model	Cat® C7.1	
Emissions	Meets U.S. EPA Tier 4 Final, EU Stage V, Korea Tier 5, China Nonroad Stage IV, Japan 2014 emission standards or India Bharat Stage III, Eurasian Economic Union Stage IIIA, UN ECE R96 Stage IIIA emission standards, equivalent to U.S. EPA Tier 3/ EU Stage IIIA.	
Net Power (1,800 rpm)		
ISO 9249/SAE J1349	151 kW	202 hp
ISO 9249 (DIN)	204 mhp	
Engine Power (1,800 rpm)		
ISO 14396	168 kW	225 hp
ISO 14396 (DIN)	227 mhp	
Bore	105 mm	4.1 in
Stroke	135 mm	5.3 in
Displacement	7.01 L	427.8 in ³

- Net power advertised is the power available at the engine flywheel when the engine is equipped with a fan, air cleaner, clean emissions module and alternator.
- Advertised power is tested per the specified standard in effect at the time of manufacture.
- Inline six-cylinder diesel engine with single turbo, charged with ATAAC and engine mounted aftertreatment (when equipped).
- No derating required up to 3000 m (9,842 ft) altitude.
- All Cat nonroad U.S. EPA Tier 4 Final, EU Stage V, Japan 2014, Korea Tier 5, and China Nonroad Stage IV diesel engines are required to use ULSD (ultra-low sulfur diesel with 15 ppm of sulfur or less) or ULSD blended with the following lower-carbon intensity fuels up to:
 - ✓ 20% biodiesel FAME (fatty acid methyl ester)*
 - ✓ 100% renewable diesel, HVO (hydrogenated vegetable oil) and GTL (gas-to-liquid) fuels

Refer to guidelines for successful application. Please consult your Cat dealer or “Caterpillar Machine Fluids Recommendations” (SEBU6250) for details.

*Engines with no aftertreatment devices can use higher blends, up to 30% biodiesel.

Air Conditioning

The air conditioning system on this machine contains the fluorinated greenhouse gas refrigerant R134a (Global Warming Potential = 1430). The system contains 1.1 kg of refrigerant which has a CO₂ equivalent of 1.573 metric tons.

Drive System

Description	Electronically controlled Hydrostatic drive with two variable displacement bent axis motors and two variable displacement slipper-type axial piston pumps
Travel Speed	Infinite variable speed from 0 to 10 km/h (0 to 6.2 mph)
Relief Valve Setting	47 500 kPa 6,890 psi

Implement System

Description	Load sensing, variable displacement piston pump
Maximum Continuous Flow	256 L/min 56.3 gal/min at 1,800 rpm at 1,800 rpm
Maximum Pressure	28 000 kPa 4,061 psi
Filter System	Implement return filter

Service Refill Capacities

Fuel Tank	320 L	84.5 gal
Diesel Exhaust Fluid (DEF) Tank (when equipped)	16 L	4.2 gal
Cooling System	32 L	8.5 gal
Crankcase (with filter)	16.5 L	4.4 gal
Final Drive (each)	15 L	4.0 gal
Hydraulic Tank	90 L	23.7 gal
Pivot Shaft	1.8 L	0.5 gal

Drawbar Pull

963 Track Loader – Waste Handler/Demolition Specifications

Standards

ROPS/FOPS

- ROPS (Rollover Protective Structure) offered by Caterpillar for the machine meets ROPS criteria ISO 3471:2008.
- FOPS (Falling Object Protective Structure) meets ISO 3449:2005 Level II.

Brakes

- Brakes meet the standard ISO 10265:2008.

Sound and Vibration Information

- The declared dynamic operator sound pressure level is 74 dB(A) when “ISO 6396:2008” is used to measure the value for an enclosed cab. The measurements were conducted at 70% of the maximum engine cooling fan speed. The sound level may vary at different engine cooling fan speeds. The cab was properly installed and maintained. The measurements were conducted with the cab doors and the cab windows closed. NOTE: The dynamic operator sound pressure level uncertainty is ± 2 dB(A).
- Hearing protection may be needed when the machine is operated with an open operator station for extended periods, in a noisy environment or with a cab that is not properly maintained.
- The guaranteed exterior sound power level is 109 dB(A) when the value is measured according to the dynamic test procedures and the conditions that are specified in “ISO 6395:2008.” The measurements were conducted at 70% of the maximum engine cooling fan speed. The sound level may vary at different engine cooling fan speeds.
- Sound level information for machines in European Union countries and in countries that adopt the “EU Directives”: If equipped, the certification label is used to verify the environmental sound certification of the machine to the requirements of the European Union. The value that is listed on the label indicates the guaranteed exterior sound power level (L_{WA}) at the time of manufacture for the conditions that are specified in “2000/14/EC.”

963 Waste Handler/Demolition Standard and Optional Equipment

Standard and Optional Equipment

Standard and optional equipment may vary. Consult your Cat dealer for details.

	Standard	Optional		Standard	Optional
POWER TRAIN			ELECTRICAL		
Cat C7.1 diesel engine with engine-mounted aftertreatment to meet U.S. EPA Tier 4 Final, EU Stage V, Korea Tier 5, China Nonroad Stage IV, Japan 2014 emission standards		✓	Ground Level Service Center	✓	
Cat C7.1 diesel engine to meet India Bharat Stage III, Eurasian Economic Union Stage IIIA, UN ECE R96 Stage IIIA emission standards, equivalent to Tier 3/Stage IIIA		✓	24 volt heavy-duty alternator	✓	
Engine turbocharger	✓		Backup alarm	✓	
Air-To-Air After Cooler (ATAAC)	✓		Two horns	✓	
Modular cooling system for engine air intake, oil and water	✓		Two heavy-duty batteries, high output, maintenance free, 1,120 CCA	✓	
Hydraulic demand fan – electronically controlled, temperature sensing	✓		Main disconnect switch	✓	
Hydraulic fan, reversing	✓		Electric starter (heavy-duty, 24 volt)	✓	
Electro Hydrostatic Control (EHC) for transmission	✓		Extra lighting. Two additional LED lights at the bottom of cab facing forward plus one underhood light		✓
Engine idle shutdown	✓		LED flashing beacon		✓
Auto engine speed control	✓		OPERATOR ENVIRONMENT		
Electric fuel pump	✓		Pressurized, sound suppressed, ROPS/FOPS Cab with tinted glass and right side sliding window	✓	
Water separator	✓		Cab package with one sliding side window and four halogen lights: two facing forward, roof mounted, two facing rearward, integrated in the air conditioner unit		✓
Glow plug starting aid	✓		Deluxe cab package with two sliding side windows and eight LED lights: four roof-mounted facing forward, two facing rearward and two facing side integrated in the air conditioner unit		✓
Engine air cleaner		✓	Deluxe high back seat – heated, with adjustable shock control		✓
Engine air precleaner		✓	Premium Plus high back seat – heated and cooled, lockable side-side isolator		✓
UNDERCARRIAGE			Adjustable armrests	✓	
Heavy Duty Extended Life (HDXL) undercarriage and tracks (38 sections), 1850 mm (72.8 in) track gauge	✓		Electro Hydraulic, seat mounted control levers with faster processing	✓	
Oscillating track roller frames	✓		V-pattern and pedal steering controls		✓
Track guiding guards, end section	✓		Joystick steering controls		✓
Hydraulic track adjuster	✓		Joystick implement control		✓
Sprocket rims with replaceable bolt-on tough steel segments	✓		Two-lever implement control		✓
Sprocket guards	✓		Seat belt, retractable, with buckling indicator on dash	✓	
Seven track rollers per side, with two upper carrier rollers, lifetime lubricated	✓		Four-point restraint ready seat	✓	
Idlers, conventional type, lifetime lubricated	✓		Air conditioning and heating	✓	
			Heater/defroster with automatic temperature control and automatic blower control	✓	
			Cab air powered precleaner		✓
			Rearview mirror, inside, adjustable	✓

Track Loader Ship Hold

Traction, balance and agility are among the key characteristics that make track loaders ideal for ship hold work. Add in speed, reach, visibility and capability to use a variety of attachments, and track loaders become the top choice for unloading bulk carriers.

Track Loader Advantages

- Machine balance
- Maneuverability, especially in tight spaces
- Smooth, responsive controls
- Ability to work on slopes
- Undercarriage provides excellent traction and smooth ride over rough, loose or uneven surfaces
- Low ground pressure
- Excellent visibility, now with rear vision camera
- Quiet, sound suppressed cab
- Adjustable, air suspension seat for operator comfort
- Ease of maintenance and cooling system cleanout
- High reach for scraping down walls or loading
- Attachment versatility

Please consult with your Cat dealer regarding Ship Hold package availability.

Ship Hold Features

- A set of durable lifting eyes designed and validated with ISO 15818:2017 provide fast and safe loading into the hold.
- Widely spaced lifting eyes provide stability during the lift.
- Steps for easy access to the cab from the front and the rear
- stability during the lift.
- Guarding helps protect the tilt cylinder rod from debris and impact.
- Thicker hydraulic tank guards.
- Optional center hole shoes reduce track packing and track chain tightening which extends undercarriage life.

Attachment Versatility

- Trim blade or two-way dozer
- General purpose buckets
- Multi-purpose buckets
- Fusion™ Quick Coupler option lets you make fast attachment changes with a wide range of tools like forks, buckets, etc. from wheel loaders and other Fusion compatible machines.

963 Track Loader – Ship Hold Specifications

Engine

Engine Model	Cat® C7.1	
Emissions	Meets U.S. EPA Tier 4 Final, EU Stage V, Korea Tier 5, China Nonroad Stage IV, Japan 2014 emission standards or India Bharat Stage III, Eurasian Economic Union Stage IIIA, UN ECE R96 Stage IIIA emission standards, equivalent to U.S. EPA Tier 3/ EU Stage IIIA.	
Net Power (1,800 rpm)		
ISO 9249/SAE J1349	151 kW	202 hp
ISO 9249 (DIN)	204 mhp	
Engine Power (1,800 rpm)		
ISO 14396	168 kW	225 hp
ISO 14396 (DIN)	227 mhp	
Bore	105 mm	4.1 in
Stroke	135 mm	5.3 in
Displacement	7.01 L	427.8 in ³

- Net power advertised is the power available at the engine flywheel when the engine is equipped with a fan, air cleaner, clean emissions module and alternator.
- Advertised power is tested per the specified standard in effect at the time of manufacture.
- Inline six-cylinder diesel engine with single turbo, charged with ATAAC and engine mounted aftertreatment (when equipped).
- No derating required up to 3000 m (9,842 ft) altitude.
- All Cat nonroad U.S. EPA Tier 4 Final, EU Stage V, Japan 2014, Korea Tier 5, and China Nonroad Stage IV diesel engines are required to use ULSD (ultra-low sulfur diesel with 15 ppm of sulfur or less) or ULSD blended with the following lower-carbon intensity fuels up to:
 - ✓ 20% biodiesel FAME (fatty acid methyl ester)*
 - ✓ 100% renewable diesel, HVO (hydrogenated vegetable oil) and GTL (gas-to-liquid) fuels

Refer to guidelines for successful application. Please consult your Cat dealer or “Caterpillar Machine Fluids Recommendations” (SEBU6250) for details.

**Engines with no aftertreatment devices can use higher blends, up to 30% biodiesel.*

Air Conditioning

The air conditioning system on this machine contains the fluorinated greenhouse gas refrigerant R134a (Global Warming Potential = 1430). The system contains 1.1 kg of refrigerant which has a CO₂ equivalent of 1.573 metric tons.

Drive System

Description	Electronically controlled Hydrostatic drive with two variable displacement bent axis motors and two variable displacement slipper-type axial piston pumps
Travel Speed	Infinite variable speed from 0 to 10 km/h (0 to 6.2 mph)
Relief Valve Setting	47 500 kPa 6,890 psi

Implement System

Description	Load sensing, variable displacement piston pump
Maximum Continuous Flow	256 L/min 56.3 gal/min at 1,800 rpm at 1,800 rpm
Maximum Pressure	28 000 kPa 4,061 psi
Filter System	Implement return filter

Service Refill Capacities

Fuel Tank	320 L	84.5 gal
Diesel Exhaust Fluid (DEF) Tank (when equipped)	16 L	4.2 gal
Cooling System	32 L	8.5 gal
Crankcase (with filter)	16.5 L	4.4 gal
Final Drive (each)	15 L	4.0 gal
Hydraulic Tank	90 L	23.7 gal
Pivot Shaft	1.8 L	0.5 gal

Drawbar Pull

963 Track Loader – Ship Hold Specifications

Track

Track Shoe Width – Heavy Duty Sealed and Lubricated	Grousers	Features
450 mm (18 in)	Double	—
450 mm (18 in)	Double	Center Hole
460 mm (18 in)	Single	Center Hole
550 mm (22 in)	Double	—
550 mm (22 in)	Double	Center Hole
560 mm (22 in)	Single	Extreme Service, Center Hole

Weights and Dimensions

Operating Weight ¹	22 040 kg	48,590 lb
Shipping Weight ²	18 822 kg	41,495 lb
Track Shoe Width – Standard ³	550 mm	22 in
Track Shoe Width – Narrow ³	450 mm	18 in
Track Rollers – Each Side		7
Number of Shoes – Each Side		38
Track on Ground	2542 mm	100 in
Ground Pressure – Standard Shoes	68.2 kPa	9.9 psi
Ground Pressure – Narrow Shoes	83.3 kPa	12.1 psi

¹Operating weight: machine with construction package, trim blade, Heavy Duty Extended Life undercarriage, aftertreatment system, lubricants, 100% fuel tank and 75 kg (165 lb) operator. For machines without aftertreatment, subtract 287 kg (632 lb).

²Shipping weight: machine with construction package, trim blade, Heavy Duty Extended Life undercarriage, aftertreatment system, lubricants, 10% fuel tank. For machines without aftertreatment, subtract 287 kg (632 lb).

³Single or double grouser, with or without center holes.

Standards

ROPS/FOPS

- ROPS (Rollover Protective Structure) offered by Caterpillar for the machine meets ROPS criteria ISO 3471:2008.
- FOPS (Falling Object Protective Structure) meets ISO 3449:2005 Level II.

Brakes

- Brakes meet the standard ISO 10265:2008.

Sound and Vibration Information

- The declared dynamic operator sound pressure level is 74 dB(A) when “ISO 6396:2008” is used to measure the value for an enclosed cab. The measurements were conducted at 70% of the maximum engine cooling fan speed. The sound level may vary at different engine cooling fan speeds. The cab was properly installed and maintained. The measurements were conducted with the cab doors and the cab windows closed. NOTE: The dynamic operator sound pressure level uncertainty is ± 2 dB(A).
- Hearing protection may be needed when the machine is operated with an open operator station for extended periods, in a noisy environment or with a cab that is not properly maintained.
- The guaranteed exterior sound power level is 109 dB(A) when the value is measured according to the dynamic test procedures and the conditions that are specified in “ISO 6395:2008.” The measurements were conducted at 70% of the maximum engine cooling fan speed. The sound level may vary at different engine cooling fan speeds.
- Sound level information for machines in European Union countries and in countries that adopt the “EU Directives”: If equipped, the certification label is used to verify the environmental sound certification of the machine to the requirements of the European Union. The value that is listed on the label indicates the guaranteed exterior sound power level (L_{WA}) at the time of manufacture for the conditions that are specified in “2000/14/EC.”

963 Ship Hold Standard and Optional Equipment

Standard and Optional Equipment *(continued)*

Standard and optional equipment may vary. Consult your Cat dealer for details.

	Standard	Optional		Standard	Optional
BUCKETS*			MAINTENANCE		
General purpose – 2.5 m ³ (3.25 yd ³)		✓	Standard lubricant		✓
General purpose with welded flush adaptor – 2.3 m ³ (3.0 yd ³)		✓	Bio lubricant		✓
Heavy-duty general purpose – 2.5 m ³ (3.25 yd ³)		✓	Cat extended life coolant	✓	
Multi-purpose – 2.0 m ³ (2.6 yd ³)		✓	Service package		✓
Heavy-duty multi-purpose – 2.0 m ³ (2.6 yd ³)		✓	Extended service package – manual hydraulic system enabling cab tilt and lock at 30 degrees safely in the field, shovel holder bracket (shovel not included)		✓
General purpose with full bolted cutting edge – 2.5 m ³ (3.25 yd ³)		✓	High speed oil change		✓
Performance general purpose – 2.8 m ³ (3.7 yd ³)		✓	Ecology drains on hydraulic oil tank	✓	
Wide flush general purpose – 2.9 m ³ (3.8 yd ³)		✓	Oil sampling valves	✓	
Quick coupler, general purpose – 2.3 m ³ (3.0 yd ³)		✓	Cat XT hoses	✓	
Quick coupler, general purpose LGP – 2.7 m ³ (3.5 yd ³)		✓	HYDO Advanced 10	✓	
Heavy-duty landfill bucket – 3.1 m ³ (4.0 yd ³)		✓	Implement oil return filter in hydraulic tank	✓	
Multi-purpose heavy-duty landfill bucket – 2.7 m ³ (3.5 yd ³)		✓	REAR ATTACHMENTS		
No bucket		✓	Bumper	✓	
Note: All buckets (excluding General Purpose with full bolted cutting edge) feature Advansys Ground Engaging Tools.			FUEL TANK		
BLADES*			Fuel tank	✓	
Trim Blade – Coal – 3158 mm (124 in)		✓	Fast Fill fuel tank		✓
Trim Blade – Iron Ore – 3178 mm (125 in)		✓	Fuel tank refilling pump		✓
Trim Blade – Fusion Quick Coupler – 3108 mm (122 in)		✓	Sediment hand pump		✓
HYDRAULICS			OTHER EQUIPMENT		
Two-valve hydraulics, two-lever		✓	Access package		✓
Two-valve hydraulics, joystick		✓	Jacket water heater (110 V)		✓
Three-valve hydraulics, front, joystick		✓	Jacket water heater (240 V)		✓
Three-valve hydraulics, rear, joystick		✓	Fusion Quick Coupler		✓
Three-valve hydraulics, rear, two-lever		✓	TECHNOLOGY PRODUCTS		
Four-valve hydraulics, front and rear, joystick		✓	Product Link ready	✓	
Standard hydraulic lines		✓	Product Link cellular		✓
Quick coupler hydraulic lines		✓	Product Link dual (cellular and satellite)		✓
			Cat Payload (available early 2023)		✓

*Bucket and attachment offerings may vary. Please consult your Cat dealer for availability.

963

Track Loader Partial Steel Mill

Track loaders provide a rugged, agile option for steel mill and other high temperature work. Specialized features are available from the factory to equip your track loader to perform in these especially harsh conditions.

High Temperature Undercarriage

- Purpose-built undercarriage includes high temperature seals in rollers, idlers, pivot shafts and final drives.
- Steel bar welded on the bottom of the track roller frame helps prevent heat distortion.
- Duo-cone™ seal guards on the final drives.
- Optional track roller guard protects against abrasion.

Steel Mill Cab

- Various heat shields inside lower doors, underneath the operator station, around air ducts and air conditioning lines.
- Heat resistant floor mat.
- Double laminated windshield 18 mm/0.7 in thick.
- Front windshield grill and thermal net against slag projections.
- Cab windows silicone sealed.
- Cab door glazing designed to protect windows against slag splatter from tracks.
- Additional metallic roof protection.
- Eight wide flood lights (four front, two rear, two sides) heat resistant, equipped with silicone sleeves.
- Metallic door handles and roof act as a heat shield.
- Air conditioning vents on both sides of operator seat post.

Additional Protective Features

- Metallic fuel tank.
- Fire retardant oil.
- Heavy-duty front and rear machine guards.
- Sealed track link with no lubrication fluid.
- Double grouser or triple grouser shoes.
- Slag bucket.

Important Notice:

This package DOES NOT feature all the other modifications required to allow the machine to run on hot slag. Examples: heat insulation for harnesses, hydraulic hoses, water, heater and air lines as well as heat shields for the tanks.

Please consult with your Cat dealer regarding Steel Mill package availability.

963 Track Loader – Partial Steel Mill Specifications

Engine

Engine Model	Cat® C7.1	
Emissions	Meets U.S. EPA Tier 4 Final, EU Stage V, Korea Tier 5, China Nonroad Stage IV, Japan 2014 emission standards or India Bharat Stage III, Eurasian Economic Union Stage IIIA, UN ECE R96 Stage IIIA emission standards, equivalent to U.S. EPA Tier 3/ EU Stage IIIA.	
Net Power (1,800 rpm)		
ISO 9249/SAE J1349	151 kW	202 hp
ISO 9249 (DIN)	204 mhp	
Engine Power (1,800 rpm)		
ISO 14396	168 kW	225 hp
ISO 14396 (DIN)	227 mhp	
Bore	105 mm	4.1 in
Stroke	135 mm	5.3 in
Displacement	7.01 L	427.8 in ³

- Net power advertised is the power available at the engine flywheel when the engine is equipped with a fan, air cleaner, clean emissions module and alternator.
- Advertised power is tested per the specified standard in effect at the time of manufacture.
- Inline six-cylinder diesel engine with single turbo, charged with ATAAC and engine mounted aftertreatment (when equipped).
- No derating required up to 3000 m (9,842 ft) altitude.
- All Cat nonroad U.S. EPA Tier 4 Final, EU Stage V, Japan 2014, Korea Tier 5, and China Nonroad Stage IV diesel engines are required to use ULSD (ultra-low sulfur diesel with 15 ppm of sulfur or less) or ULSD blended with the following lower-carbon intensity fuels up to:

- ✓ 20% biodiesel FAME (fatty acid methyl ester)*
- ✓ 100% renewable diesel, HVO (hydrogenated vegetable oil) and GTL (gas-to-liquid) fuels

Refer to guidelines for successful application. Please consult your Cat dealer or “Caterpillar Machine Fluids Recommendations” (SEBU6250) for details.

**Engines with no aftertreatment devices can use higher blends, up to 30% biodiesel.*

Air Conditioning

The air conditioning system on this machine contains the fluorinated greenhouse gas refrigerant R134a (Global Warming Potential = 1430). The system contains 1.1 kg of refrigerant which has a CO₂ equivalent of 1.573 metric tons.

Drive System

Description	Electronically controlled Hydrostatic drive with two variable displacement bent axis motors and two variable displacement slipper-type axial piston pumps
Travel Speed	Infinite variable speed from 0 to 10 km/h (0 to 6.2 mph)
Relief Valve Setting	47 500 kPa 6,890 psi

Implement System

Description	Load sensing, variable displacement piston pump
Maximum Continuous Flow	256 L/min 56.3 gal/min at 1,800 rpm at 1,800 rpm
Maximum Pressure	28 000 kPa 4,061 psi
Filter System	Implement return filter

Service Refill Capacities

Metallic Fuel Tank	200 L	52.8 gal
Diesel Exhaust Fluid (DEF) Tank (when equipped)	16 L	4.2 gal
Cooling System	32 L	8.5 gal
Crankcase (with filter)	16.5 L	4.4 gal
Final Drive (each)	15 L	4.0 gal
Hydraulic Tank	90 L	23.7 gal
Pivot Shaft	1.8 L	0.5 gal

Drawbar Pull

963 Track Loader – Partial Steel Mill Specifications

Weights and Dimensions

Construction configuration shown.

	Partial Steel Mill	
Operating Weight ¹	22 004 kg	48,510 lb
Shipping Weight ²	18 815 kg	41,480 lb
1 Track Shoe Width		
Triple Grouser	430 mm	17 in
Double Grouser	450 mm	18 in
Track Rollers – Each Side		7
Number of Shoes – Each Side		38
Track on Ground	2542 mm	100.0 in
Ground Pressure		
430 mm (17 in) triple grouser shoes	87.0 kPa	12.6 psi
450 mm (18 in) double grouser shoes	83.2 kPa	12.1 psi
2 Overall Machine Width with Slag Bucket	2566 mm	101 in
3 Ground Clearance	471 mm	18.5 in
4 Machine Height to Top of Cab	3366 mm	132.5 in
5 Machine Length to Front of Tracks	4843 mm	194.6 in
6 Ramp Angle		29°
7 Overall Machine Length with Slag Bucket	6851 mm	269.7 in
8 Hinge Pin Height at Maximum Lift	3940 mm	155.1 in
9 Lift Arm Clearance at Maximum Lift	3590 mm	141.3 in
10 Dump Clearance at Maximum Lift and 45° Discharge	2913 mm	114.7 in
11 Reach at Maximum Lift and 45° Discharge	1155 mm	45.5 in
Turning Radius	4.0 m	157.5 in

¹Operating weight: machine with partial steel mill package, Slag bucket with teeth and segments, Heavy Duty Extended Life undercarriage, aftertreatment system, lubricants, 100% fuel tank and 75 kg (165 lb) operator. For machines without aftertreatment, subtract 287 kg (632 lb).

²Shipping weight: machine with partial steel mill package, Heavy Duty Extended Life undercarriage, aftertreatment system, lubricants, 10% fuel tank. For machines without aftertreatment, subtract 287 kg (632 lb).

963 Track Loader – Partial Steel Mill Specifications

Buckets

Pin-On Buckets – Standard Linkage	Slag Bucket	
Cutting Edge Type	Long teeth and segment	
Bucket Weight	2872 kg	6,332 lb
Bucket Width	2564 mm	101.0 in
Rated Capacity at 100% Fill Factor ¹	2.3 m ³	3.0 yd ³
Rated Operating Capacity ²	4983 kg	10,985 lb
Static Tipping Load ³	14 236 kg	31,386 lb
Breakout Force	163 944 N	36,856 lbf

¹Volumetric bucket capacity as per ISO 7546:1983.

²Rated Operating Capacity should be considered with 35% Static Tipping Load as required by ISO 14397-1:2007.

³Machine equipped with standard and additional counterweights.

Standards

ROPS/FOPS

- ROPS (Rollover Protective Structure) offered by Caterpillar for the machine meets ROPS criteria ISO 3471:2008.
- FOPS (Falling Object Protective Structure) meets ISO 3449:2005 Level II.

Brakes

- Brakes meet the standard ISO 10265:2008.

Sound and Vibration Information

- The declared dynamic operator sound pressure level is 74 dB(A) when “ISO 6396:2008” is used to measure the value for an enclosed cab. The measurements were conducted at 70% of the maximum engine cooling fan speed. The sound level may vary at different engine cooling fan speeds. The cab was properly installed and maintained. The measurements were conducted with the cab doors and the cab windows closed. NOTE: The dynamic operator sound pressure level uncertainty is ± 2 dB(A).
- Hearing protection may be needed when the machine is operated with an open operator station for extended periods, in a noisy environment or with a cab that is not properly maintained.
- The guaranteed exterior sound power level is 109 dB(A) when the value is measured according to the dynamic test procedures and the conditions that are specified in “ISO 6395:2008.” The measurements were conducted at 70% of the maximum engine cooling fan speed. The sound level may vary at different engine cooling fan speeds.
- Sound level information for machines in European Union countries and in countries that adopt the “EU Directives”: If equipped, the certification label is used to verify the environmental sound certification of the machine to the requirements of the European Union. The value that is listed on the label indicates the guaranteed exterior sound power level (L_{WA}) at the time of manufacture for the conditions that are specified in “2000/14/EC.”

963 Partial Steel Mill Standard and Optional Equipment

Standard and Optional Equipment

Standard and optional equipment may vary. Consult your Cat dealer for details.

	Standard	Optional		Standard	Optional
POWER TRAIN			ELECTRICAL		
Cat C7.1 diesel engine with engine-mounted aftertreatment to meet U.S. EPA Tier 4 Final, EU Stage V, Korea Tier 5, China Nonroad Stage IV, Japan 2014 emission standards		✓	Ground Level Service Center	✓	
Cat C7.1 diesel engine to meet India Bharat Stage III, Eurasian Economic Union Stage IIIA, UN ECE R96 Stage IIIA emission standards, equivalent to Tier 3/Stage IIIA		✓	24 volt heavy-duty alternator	✓	
Engine turbocharger	✓		Backup alarm	✓	
Air-To-Air After Cooler (ATAAC)	✓		Two horns	✓	
Modular cooling system for engine air intake, oil and water	✓		Two heavy-duty batteries, high output, maintenance free, 1,120 CCA	✓	
Hydraulic demand fan – electronically controlled, temperature sensing	✓		Main disconnect switch	✓	
Hydraulic fan, reversing	✓		Electric starter (heavy-duty, 24 volt)	✓	
Electro Hydrostatic Control (EHC) for transmission	✓		LED flashing beacon		✓
Engine idle shutdown	✓		OPERATOR ENVIRONMENT		
Auto engine speed control	✓		Steel mill cab – pressurized, sound suppressed, ROPS/FOPS cab, with silicone sealed glass and heavy-duty laminated windshield glass	✓	
Electric fuel pump	✓		Deluxe high back seat – heated, with adjustable shock control		✓
Water separator	✓		Premium Plus high back seat – heated and cooled, lockable side-side isolator		✓
Glow plug starting aid	✓		Adjustable armrests	✓	
Engine air cleaner		✓	Electro Hydraulic, seat mounted control levers with faster processing	✓	
Engine air precleaner		✓	V-pattern and pedal steering controls		✓
UNDERCARRIAGE			Joystick steering controls		✓
Heavy Duty Extended Life (HDXL) undercarriage and tracks (38 sections), 1850 mm (72.8 in) track gauge	✓		Joystick implement control		✓
Sealed Heavy Duty Tracks		✓	Two-lever implement control		✓
430 mm (17 in) High Temperature Heavy Duty Sealed Track – Triple Grousers		✓	Seat belt, retractable, with buckling indicator on dash	✓	
450 mm (18 in) High Temperature Heavy Duty Sealed Track – Double		✓	Four-point restraint ready seat	✓	
Oscillating track roller frames	✓		Air conditioning and heating	✓	
Track guiding guards, end section	✓				
Hydraulic track adjuster	✓				
Sprocket rims with replaceable bolt-on tough steel segments	✓				
Sprocket guards	✓				
Seven track rollers per side, with two upper carrier rollers, lifetime lubricated	✓				
Idlers, conventional type, lifetime lubricated	✓

963 Partial Steel Mill Standard and Optional Equipment

Standard and Optional Equipment *(continued)*

Standard and optional equipment may vary. Consult your Cat dealer for details.

	Standard	Optional		Standard	Optional
OPERATOR ENVIRONMENT <i>(continued)</i>			OTHER STANDARD EQUIPMENT		
Heater/defroster with automatic temperature control and automatic blower control	✓		Durable metal fender	✓	
Rearview mirror, inside, adjustable	✓		Exterior sound suppression	✓	
Radio ready. Includes speakers, antenna and 12 V power outlet and 5 V USB port	✓		Load sensing implement pump with variable displacement	✓	
Radio – FM Ready Kit		✓	Z-bar loader linkage	✓	
Radio – Bluetooth & Aux & Mic		✓	Implement cylinders with sensors	✓	
Parking brake switch and “brake-on” indicator light	✓		Engine enclosure with lockable doors	✓	
Implement lock-out switch	✓		Debris resistant radiator core (six fins-per-inch)	✓	
High Definition rearview camera	✓		Hinged radiator guard and swing out fan	✓	
254 mm (10 in) color touchscreen display with integrated rear camera display and machine slope indicator	✓		4 × 2 easy tie-down points on chassis	✓	
Three selectable working modes (Auto, Power, Eco)	✓		GUARDING		
Operator programmable lift and tilt kickouts	✓		Heavy-duty front guard	✓	
Machine Pitch and Roll indicate	✓		Windshield guard with metallic screen	✓	
Bucket shake	✓		Full bottom guards	✓	
Remote services (Troubleshoot/Remote Flash)		✓	Idler guard (none)		✓
Heavy-duty rubber floor mat	✓		Idler guard		✓
Windshield washers and silicone wipers, multiple speed, front and rear	✓		Idler guard – ship hold		✓
Durable metal roof	✓		Front light guard		✓
Coat hook	✓		Windshield guard		✓
Storage compartments under left armrest	✓		Lift cylinder guard	✓	
Document holder on right console	✓		Tilt cylinder guard	✓	
			Two-piece final drive guard		✓
			Three-piece final drive guard		✓
			Final drive bottom guard		✓
			Track roller guard		✓
